INTRODUCTION

This publication is the 70th production of Vital Statistics Data of the State of Georgia. The 1989 data set is divided into three volumes: Births, Mortality, and Population. Their purpose is to serve as a reference source to provide vital statistics information to public and private individuals, institutions, and agencies involved with Health Services; especially the analysis, planning and evaluation of public health service delivery for Georgia citizens.

The tables in this volume reflect annual frequencies and rates of vital events for the states' residents (except as noted) by state, health district, metropolitan statistical area, county and city.

The Office of Planning and Budget's civilian, non-institutional population projections used for some rates, were adjusted by adding a resident military component and a resident student percentage. The population projections are produced to allow the reader to compute rates not represented in this volume. The reader must note, however, that there have been substantial changes in some county populations. In 1986, OPB re-calculated population estimates through 1990. The rates shown in this volume, therefore, may vary slightly from previous publications or other projections due to these changes. Also, there have been substantial population shifts in some counties in Georgia since the 1980 census, however, we feel the rates shown in this volume are onsistent with previous year rates.

Other vital statistics data not presented in the publication are available upon request, but may require a production fee. Send all statistical requests to:

Vital Records and Health Statistics
878 Peachtree Street, NE, Suite 200
Atlanta, Georgia 30309

We trust the information provided in this volume will prove helpful. Comments or suggestions regarding this publication are welcome.

This report includes 1989 Georgia resident data taken from death certificates received in the State Vital Records office by June 30, 1990. The figures and rates reflect data from the vital events as shown in the tables. Any differences between the "Total" and "Race Totals" is accounted for by "Other" races. All races are included in the "Total" category.

INFANT MORTALITY

The assignment of infant mortality frequencies and rates is mainly determined by the mother's residence as shown on the matching Certificate of Live Birth. Infant deaths occurring to resident military personnel are included.

The following methodology is employed to assign infant deaths to the most appropriate counties in Georgia. Each infant death record, and the corresponding birth record, is reviewed to determine the most reliable statistical county of residence assignment. However, several types of infant death record matches may occur during the year. Each process is detailed below.

Type (1) The majority of infant deaths occur in the same county where the infant was born. This usually means that the county of residence is the same on both certificates.

Example: The death certificate shows Fulton County as the residence. The birth certificate shows mother's residence as Fulton County. This infant death is coded to Fulton County (code 060) shown on the death certificate. The matched infant death and birth record is sent to District 3 Unit 2 (Fulton).

Type (2) A small number of matched records show different counties of residence on matched certificates. The records are queried back to the appropriate local registrar to determine if the county of residence shown is correct on each record. If the indicated residences are actually different, the infant death is statistically assigned to the mother's county of residence shown on the birth certificate.

Example: An infant death certificate shows Fulton County (code 060) as the residence but the birth record indicates Dekalb County (code 044). The statistical computer file is changed to reflect code 044 and the matched set of records is sent to Dekalb County.

Type (3) Some infant deaths (or births) occur to Georgia residents in other states (mostly in Florida, Alabama, Tennessee, North Carolina and South Carolina).

Example: An infant death occurs to a Georgia resident in Alabama. A copy of an Alabama death certificate is received in the state vital records office showing Muscogee County as residence. (There is an interstate exchange agreement for vital records between all states). The Georgia matching birth certificate shows Muscogee County as the mother's residence.

The same method of assignment is followed in this case as in Type 1 above. The infant death is assigned to Muscogee County, District 7 (Columbus). If the matching Georgia birth record showed a different county of residence than the death, for example Glynn County, then the assignment process would follow as in Type 2 above. In this case the infant death would be assigned to Glynn County, District 9-3 (Brunswick) and the matched set of records sent there.

Type 4 If a Georgia resident is shown on an out-of-state (non-Georgia) death record and no Georgia birth record can be found to match it, the assignment of the infant death will be to the county of residence shown on the death record.

Example: A copy of a South Carolina death certificate is received in the state office showing Richmond County as residence. No Georgia birth record is found or South Carolina birth recorded. This infant death is assigned to Richmond County, District 6 (Augusta) and the copy sent to this district.

Type 1 through 4 procedures account for close to all infant deaths occurring to residents of Georgia. (All of the counted infant deaths are to residents of Georgia, not to residents of other states).

DEFINITIONS

Population	Office of Planning and Budget (OPB) civilian, non-institutional projections including an estimated resident military component for appropriate counties, plus a resident student percentage.
Race	Race classifications are tabulated by white and black categories as stated on vital records. "Other" or unknown races are included in the total category.
Live birth to an unwed mother	A live birth to a stated unmarried female or to one who did not state marital status and no father's name appears on the birth certificate.
Low birth weight	A live birth with a weight less than 2,500 grams.
Very low birth weight.	A live birth with a weight of less than 1,500 grams.
Spontaneous abortion or stillbirth	Pregnancy resulting in other than live birth or induced abortion.
Induced abortion	The purposeful interruption of pregnancy with the intent to produce other than a live infant or to remove a dead fetus.
Infant mortality	A death occurring to an infant less than one year of age.
Neonatal mortality	A death occurring to an infant less than 28 days of live.
Postneonatal mortality	A death occurring to an infant 28 days or more, but less than one year of age.
Maternal mortality	A death resulting from complications of pregnancy, childbirth, or puerperium.
Total conceptions	All live births, plus all induced abortions, plus all spontaneous abortions or stillbirths.

FORMULAS USED IN THIS VOLUME

Crude Birth Rate	$\frac{\text{Total live births}}{\text{Total population}} \times 1{,}000$
Age-specific fertility rate	$\frac{\text{Total live births in age group}}{\text{Total female population in age group}} \times 1{,}000$
Crude live birth rate to unwed mothers	$\frac{\text{Total live births to unwed mothers}}{\text{Total female population (15-44)}} \times 1{,}000$
Age-specific live birth rate to unwed mothers	$\frac{\text{Total live births to unwed mothers in age group}}{\text{Total female population age group}} \times 1{,}000$
Percent of live births by birthweight	$\frac{\text{Total live births in weight group}}{\text{Total live births}} \times 100$
Percent of out-of-hospital live births	$\frac{\text{Total out-of-hospital live births}}{\text{Total live births}} \times 100$
Crude spontaneous abortion rate	$\frac{\text{Total spontaneous abortions}}{\text{Total female population (15-44)}} \times 1{,}000$
Age-specific spontaneous abortion rate	$\frac{\text{Spontaneous abortions in age group}}{\text{Total female population in age group}} \times 1{,}000$
Crude induced abortion rate	$\frac{\text{Total induced abortions}}{\text{Total female population (15-44)}} \times 1{,}000$
Age-specific induced abortion rate	$\frac{\text{Induced abortions in age group}}{\text{Total female population in age group}} \times 1{,}000$
Crude mortality rate	$\frac{\text{Total deaths}}{\text{Total population}} \times 1{,}000$
Infant mortality rate	$\frac{\text{Total infant deaths}}{\text{Total live births}} \times 1{,}000$
Neonatal mortality rate	$\frac{\text{Total infant deaths <28 days}}{\text{Total live births}}$
Postneonatal mortality rate	$\frac{\text{Total infant deaths 28 days to <1 year}}{\text{Total live births}} \times 1{,}000$
Life-state-specific mortality rate	$\frac{\text{Total deaths in life stage}}{\text{Total population in life state}} \times 100{,}000$
Cause-specific mortality rate	$\frac{\text{Total deaths from specific cause}}{\text{Total population}} \times 100{,}000$
Marriage rate	$\frac{\text{Total marriages}}{\text{Total population}} \times 1{,}000$

Divorce rate $\frac{\text{Total divorces}}{\text{Total population}} \times 1{,}000$

NOTE: Events indicating unknown in some categories are assigned to the group of events showing the largest number of occurrences.

NOTE: Hispanic tables show only frequencies of events, with no rates figures; zeroes entered in the rate columns are not valid rates.

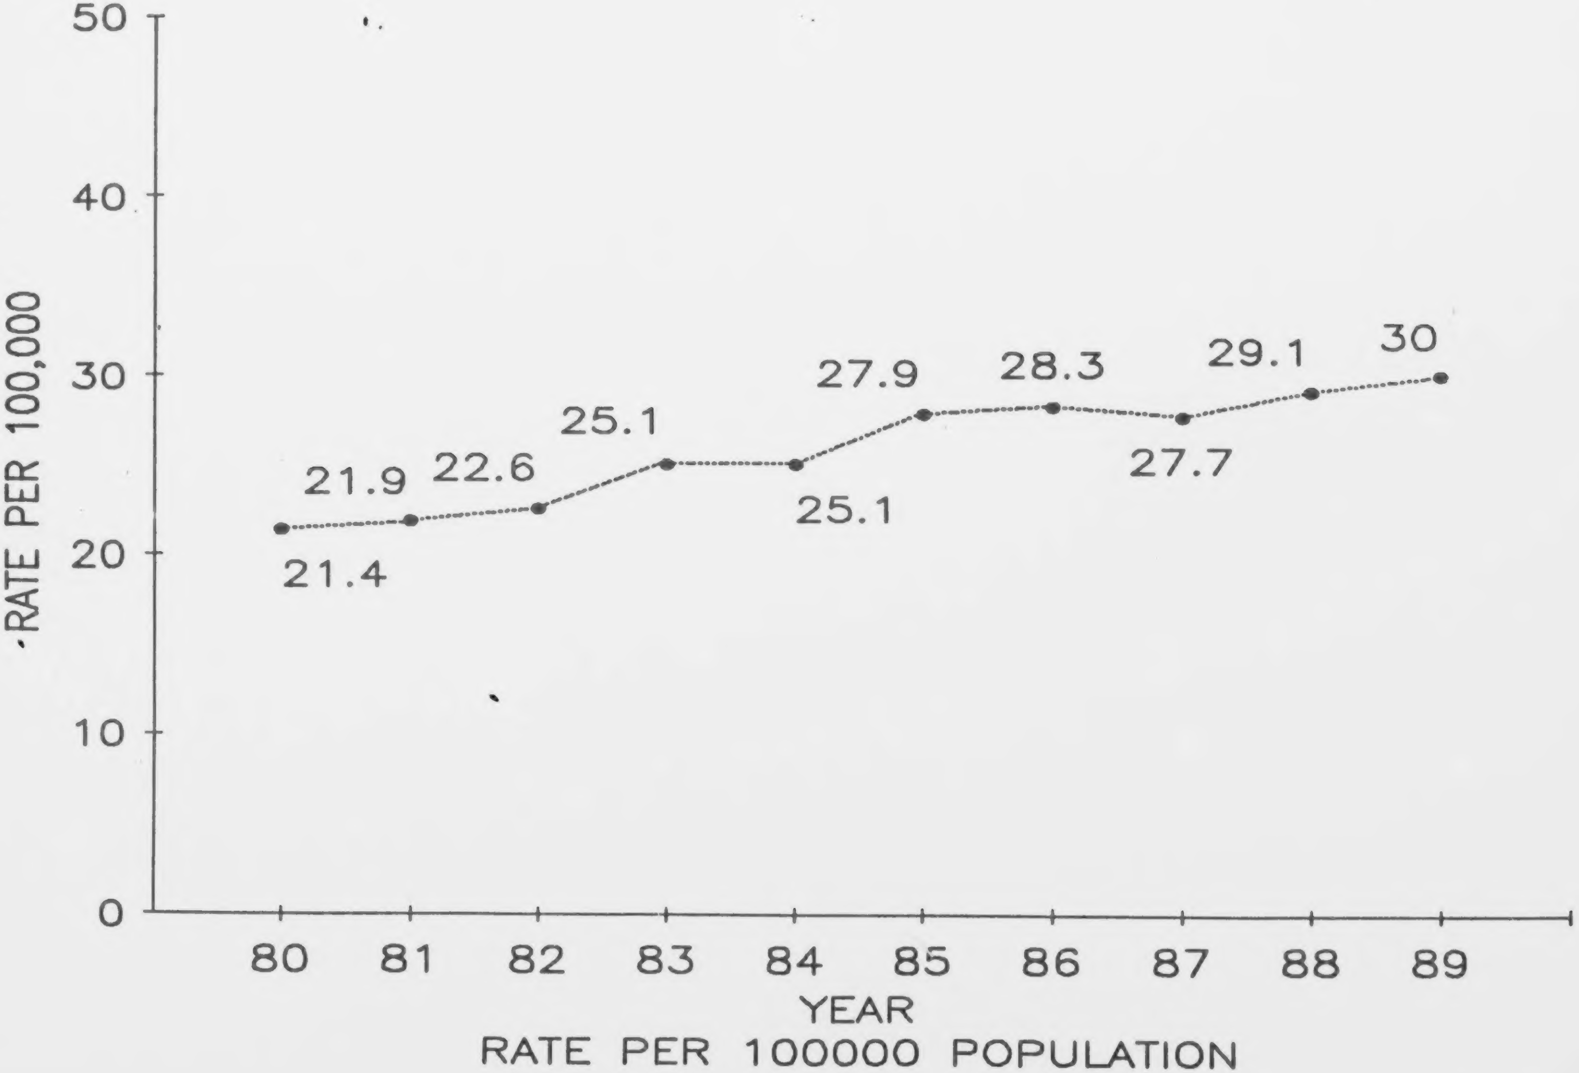
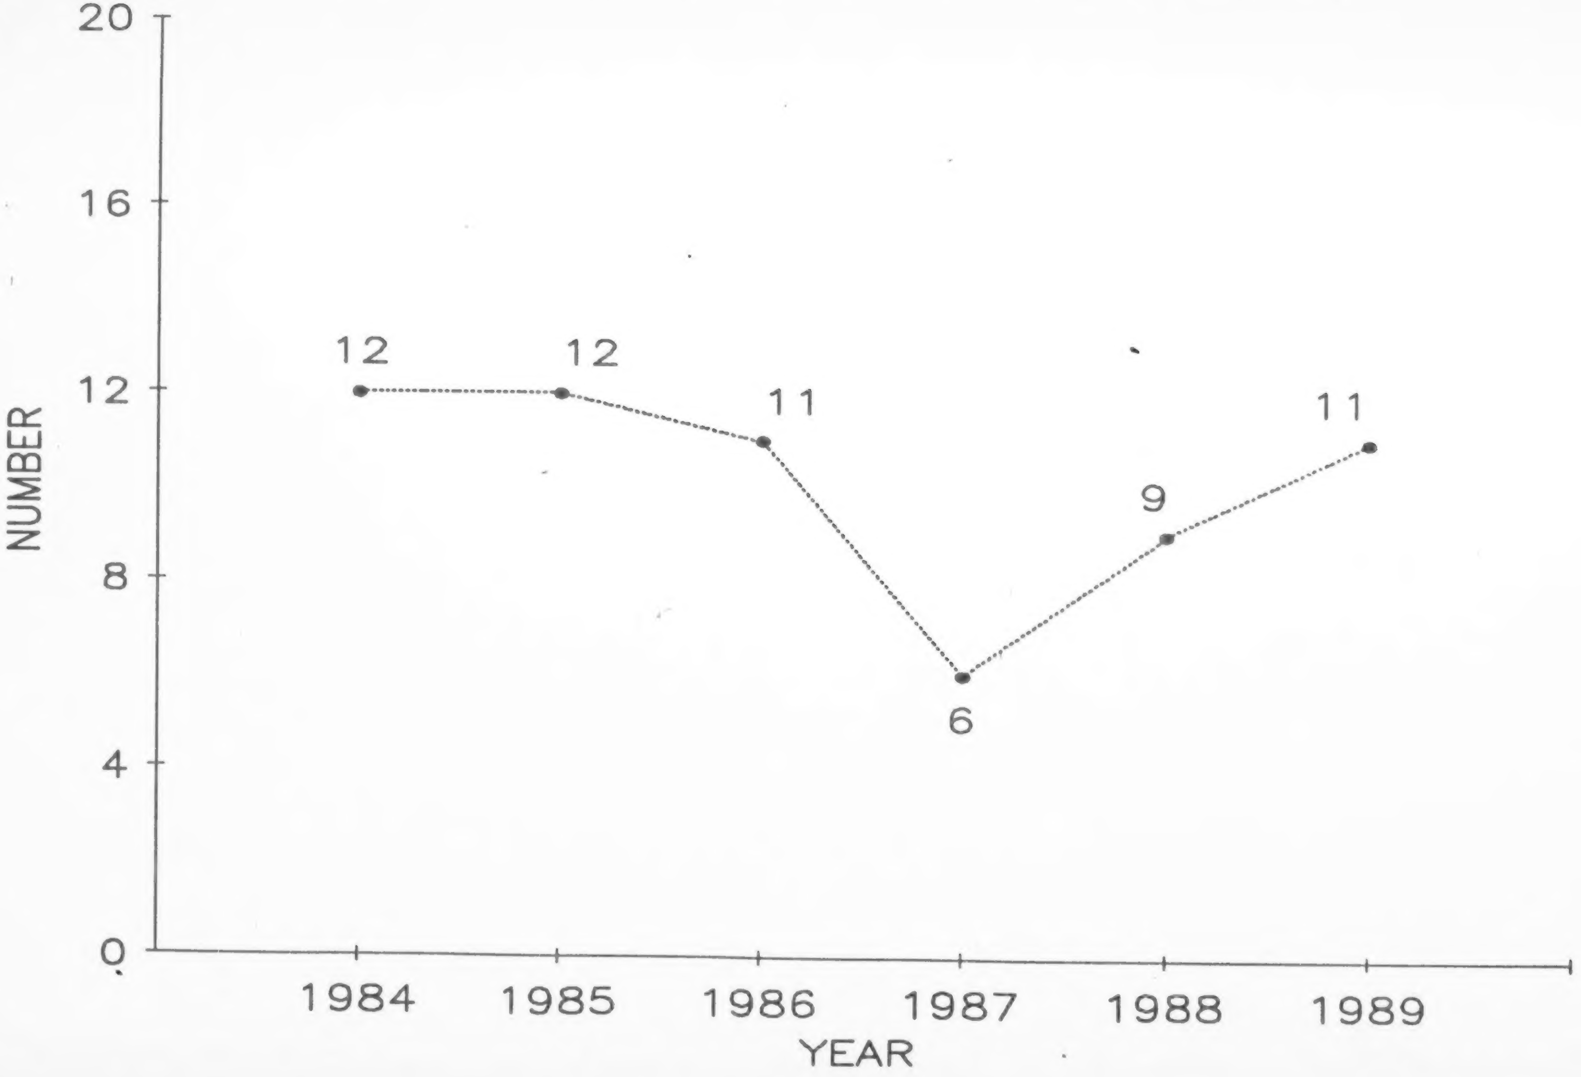
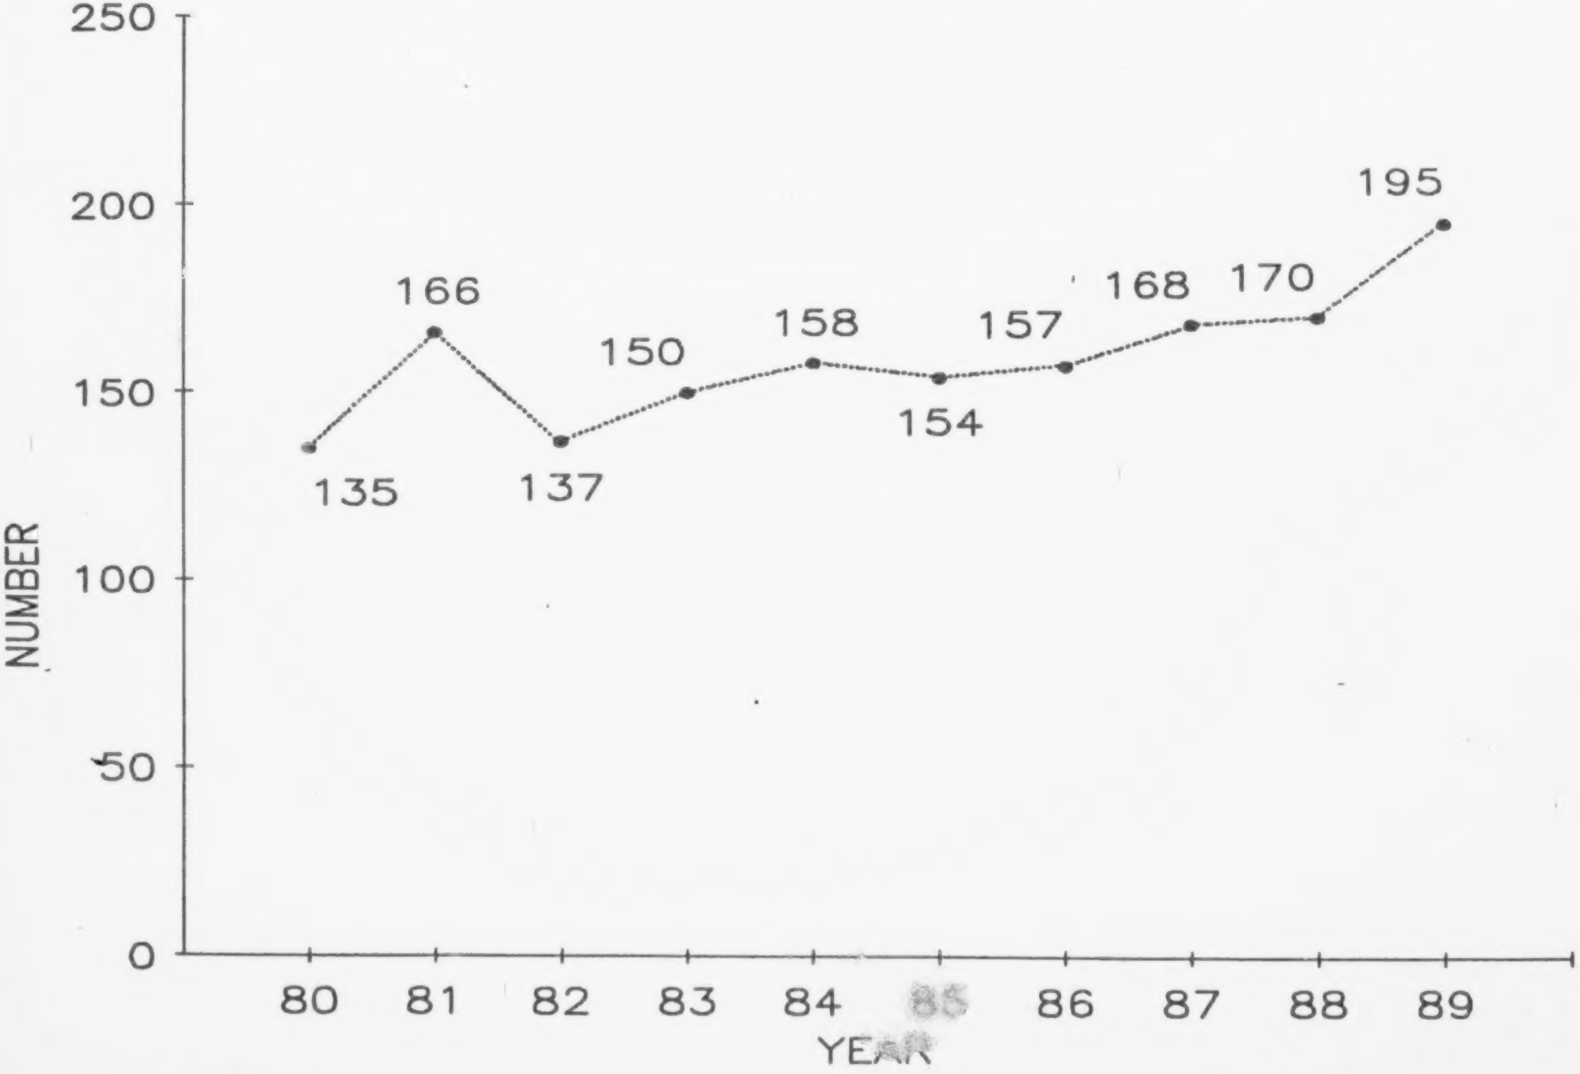
CHRONIC OBSTRUCTIVE PULMONARY DIS.
1980 - 1989, (ICD 490 - 493)



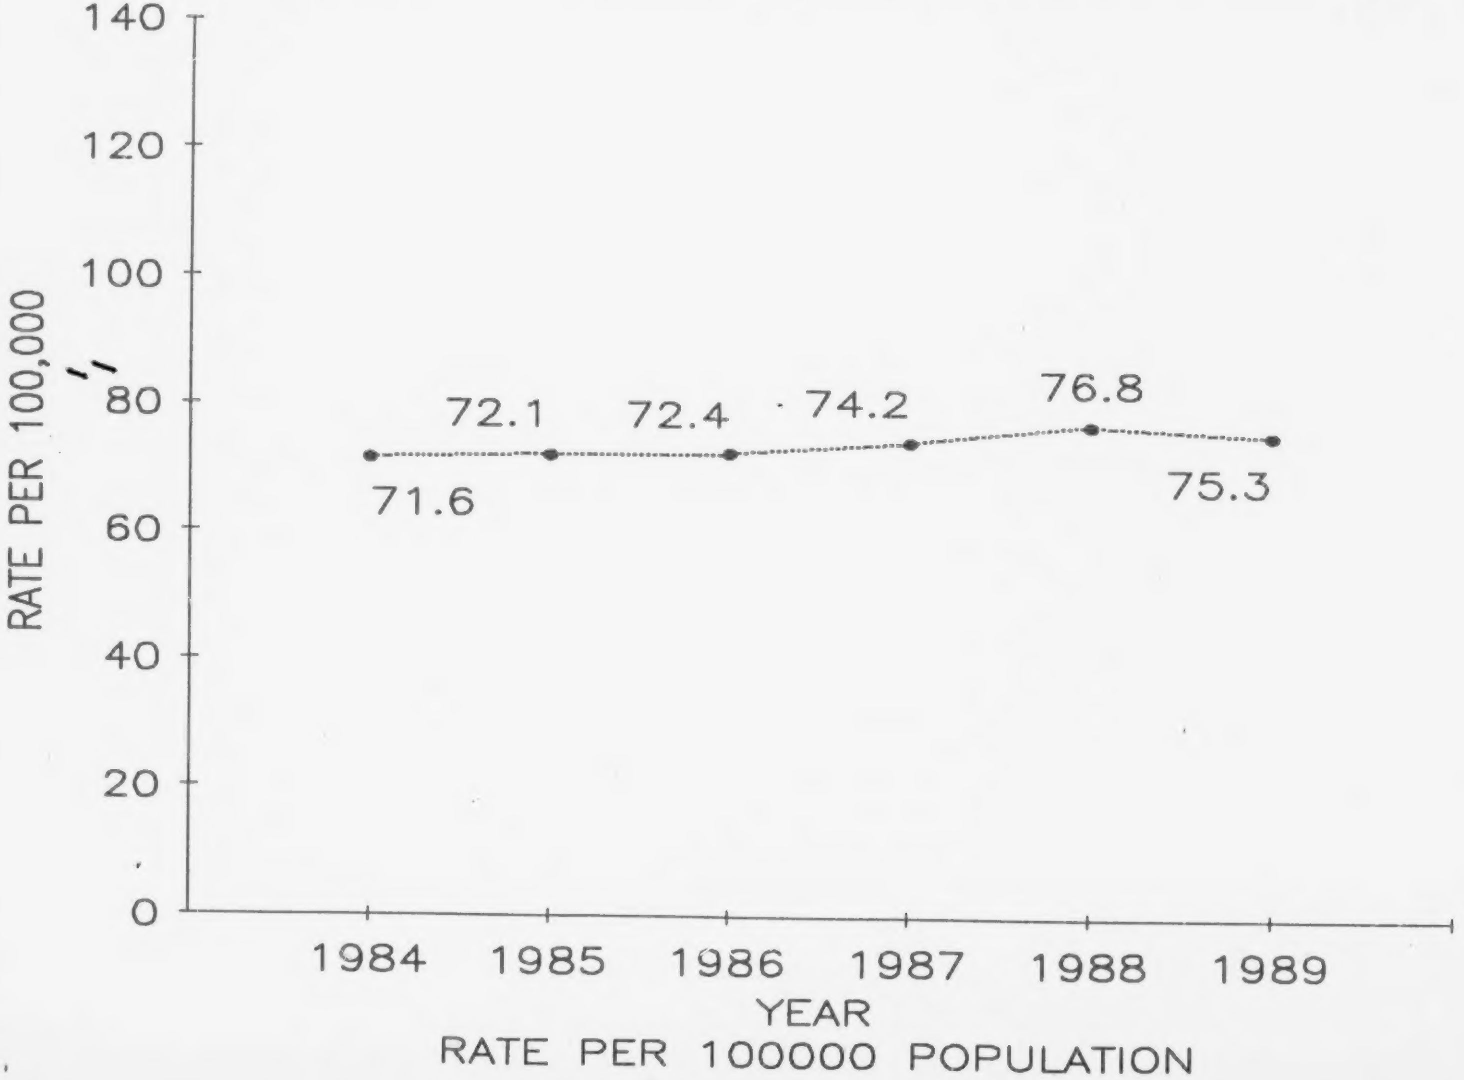
MATERNAL DEATHS
1984 - 1989, (ICD 630-676)



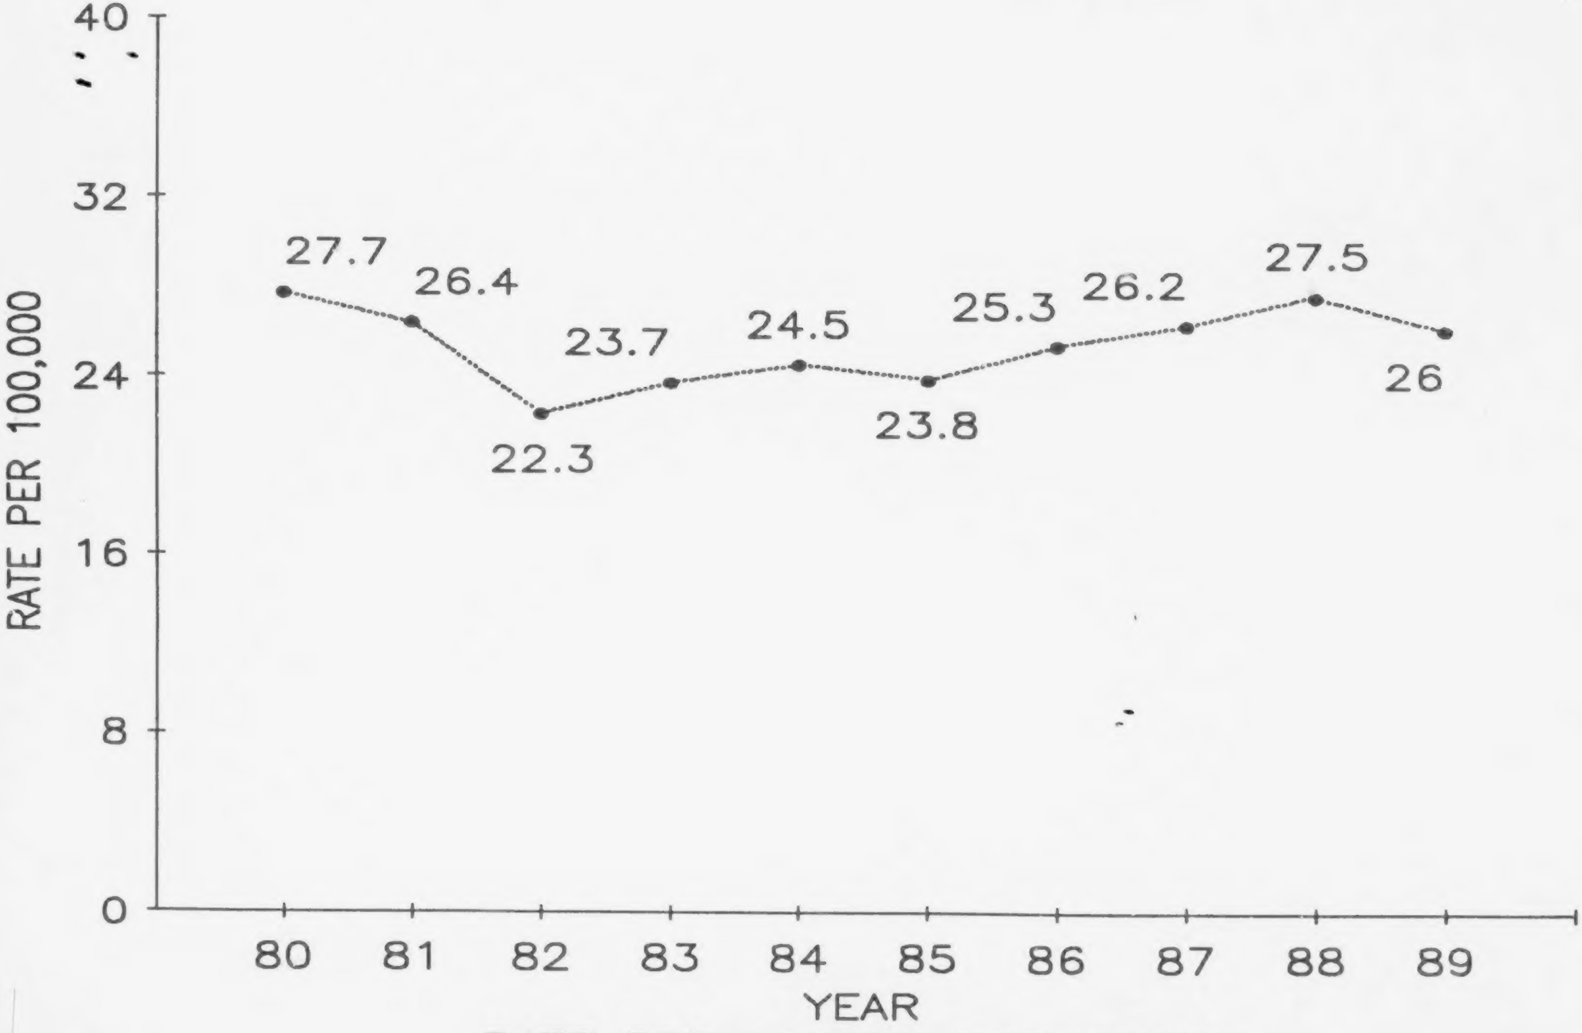
SUDDEN INFANT DEATH SYNDROME
1980 - 1989, ICD (798)



INJURY AND POISONING
1984 - 1989 (ICD E800-E999)

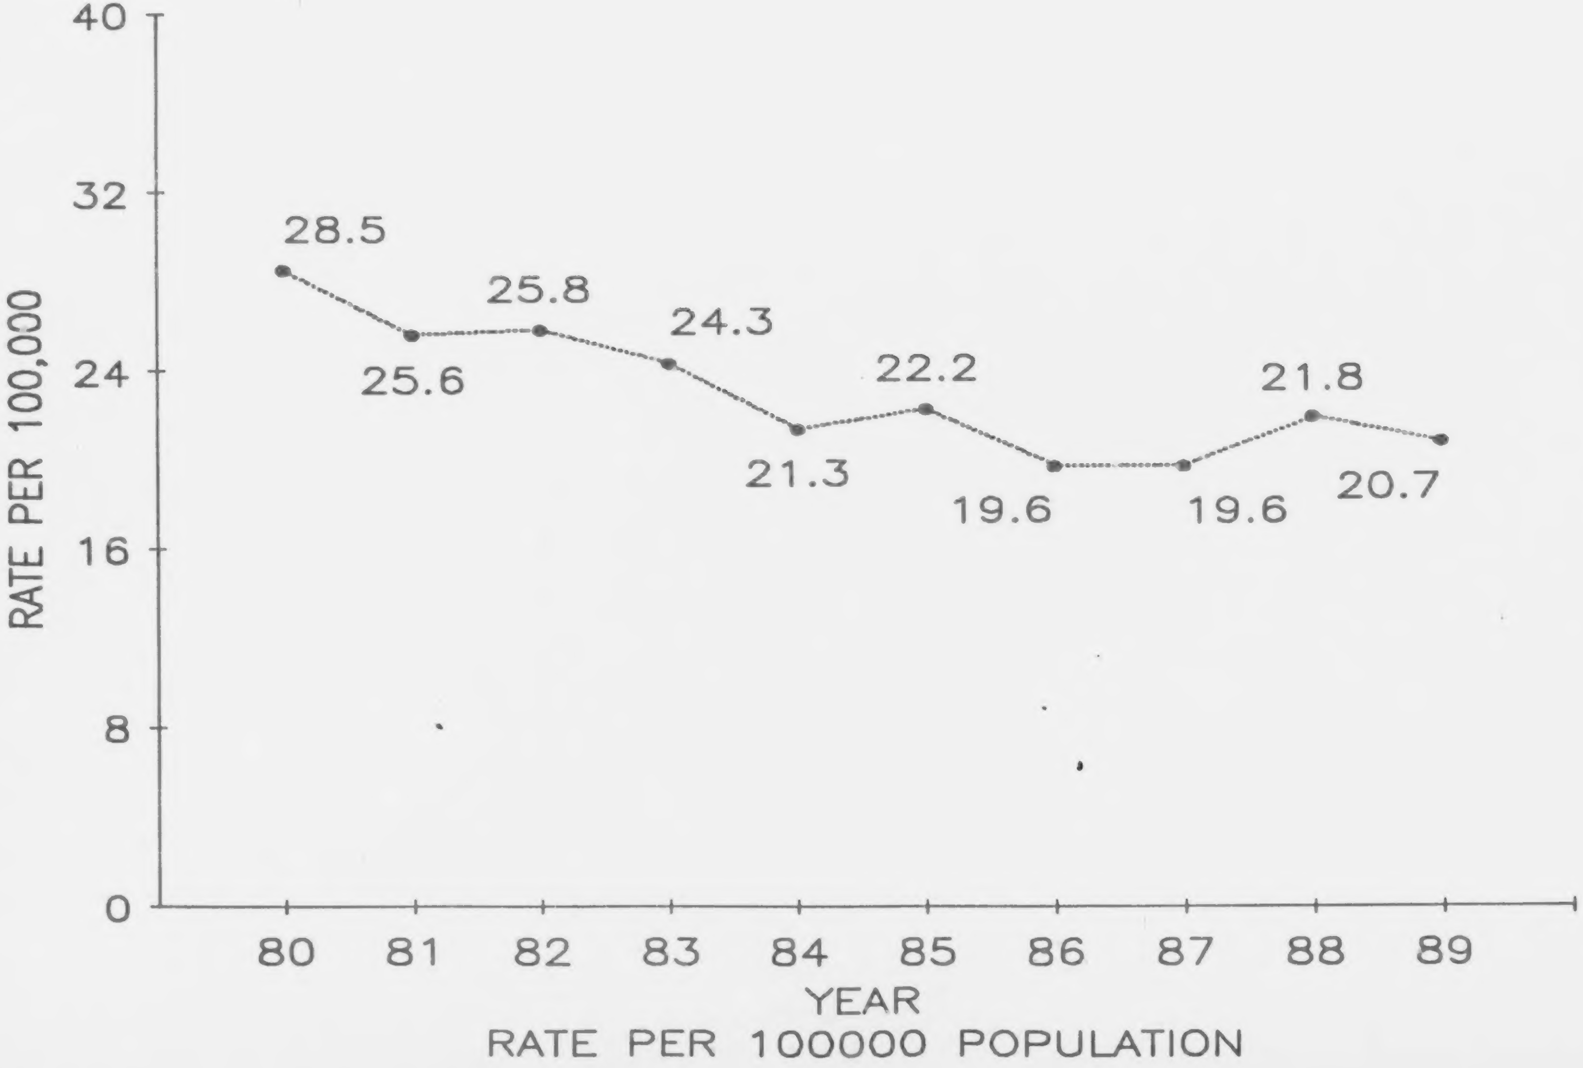


MOTOR VEHICLE ACCIDENTS, 1980 - 1989
(ICD E810 - E825)

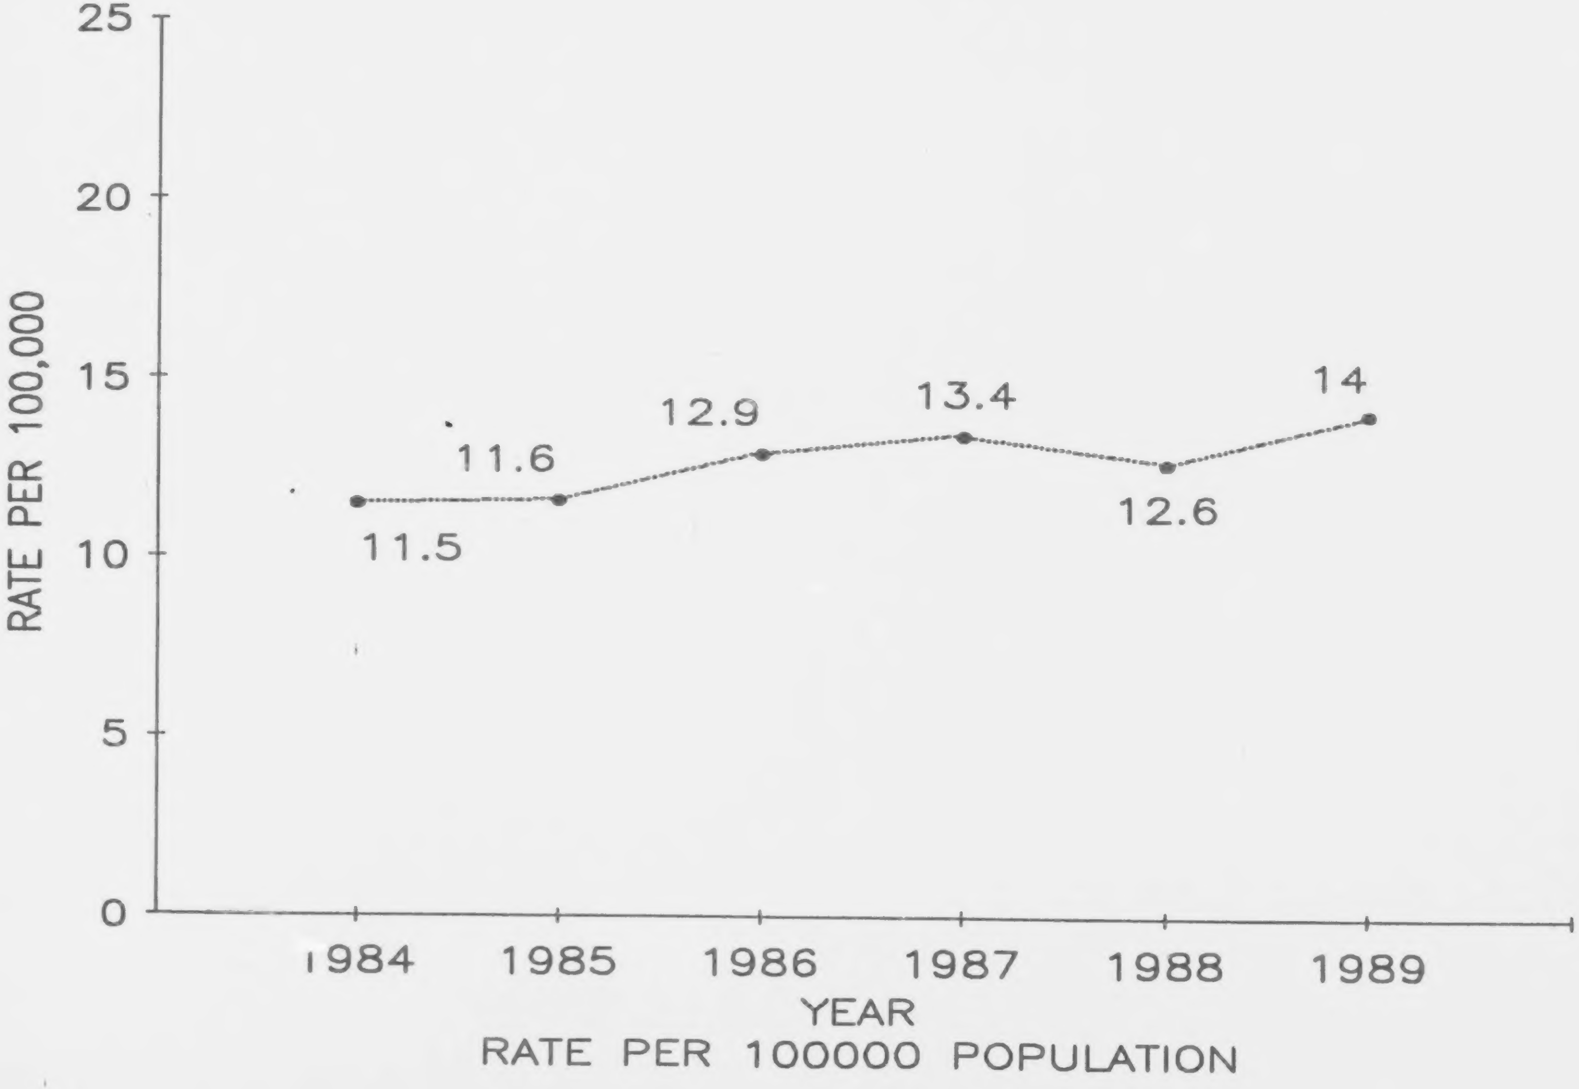


RATE PER 100000 POPULATION

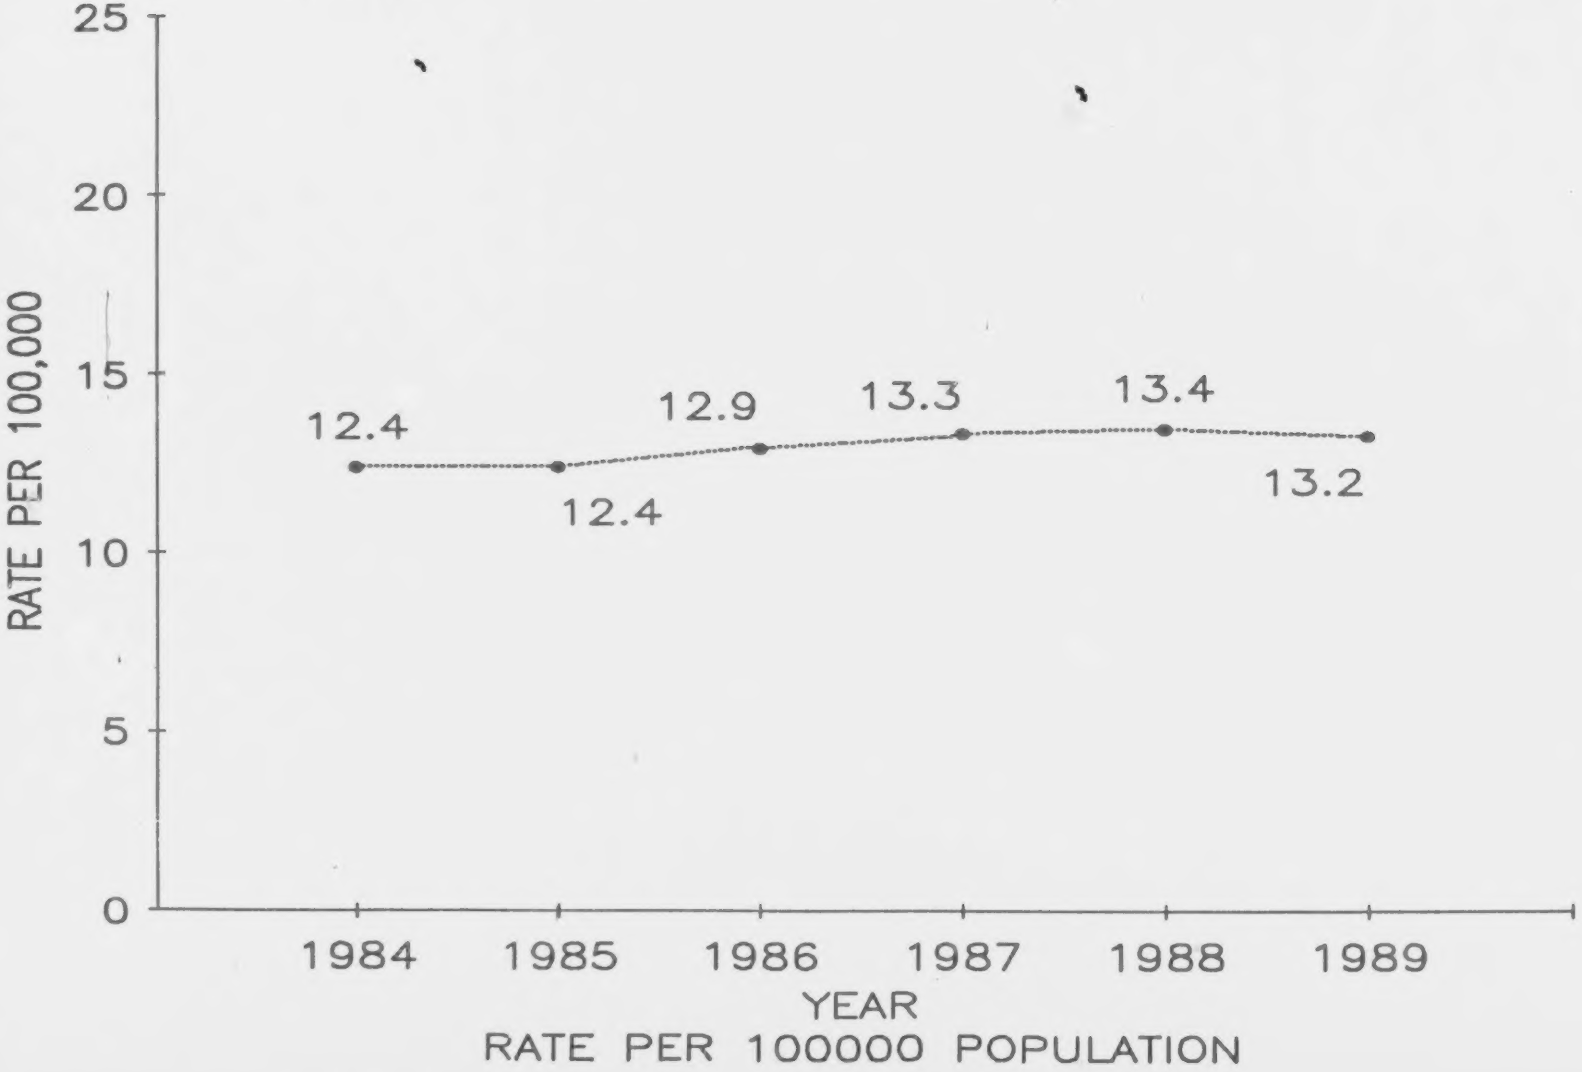
ALL OTHER ACCIDENTS, 1980 - 1989
(ICD E800 - E807; E826 - E949)



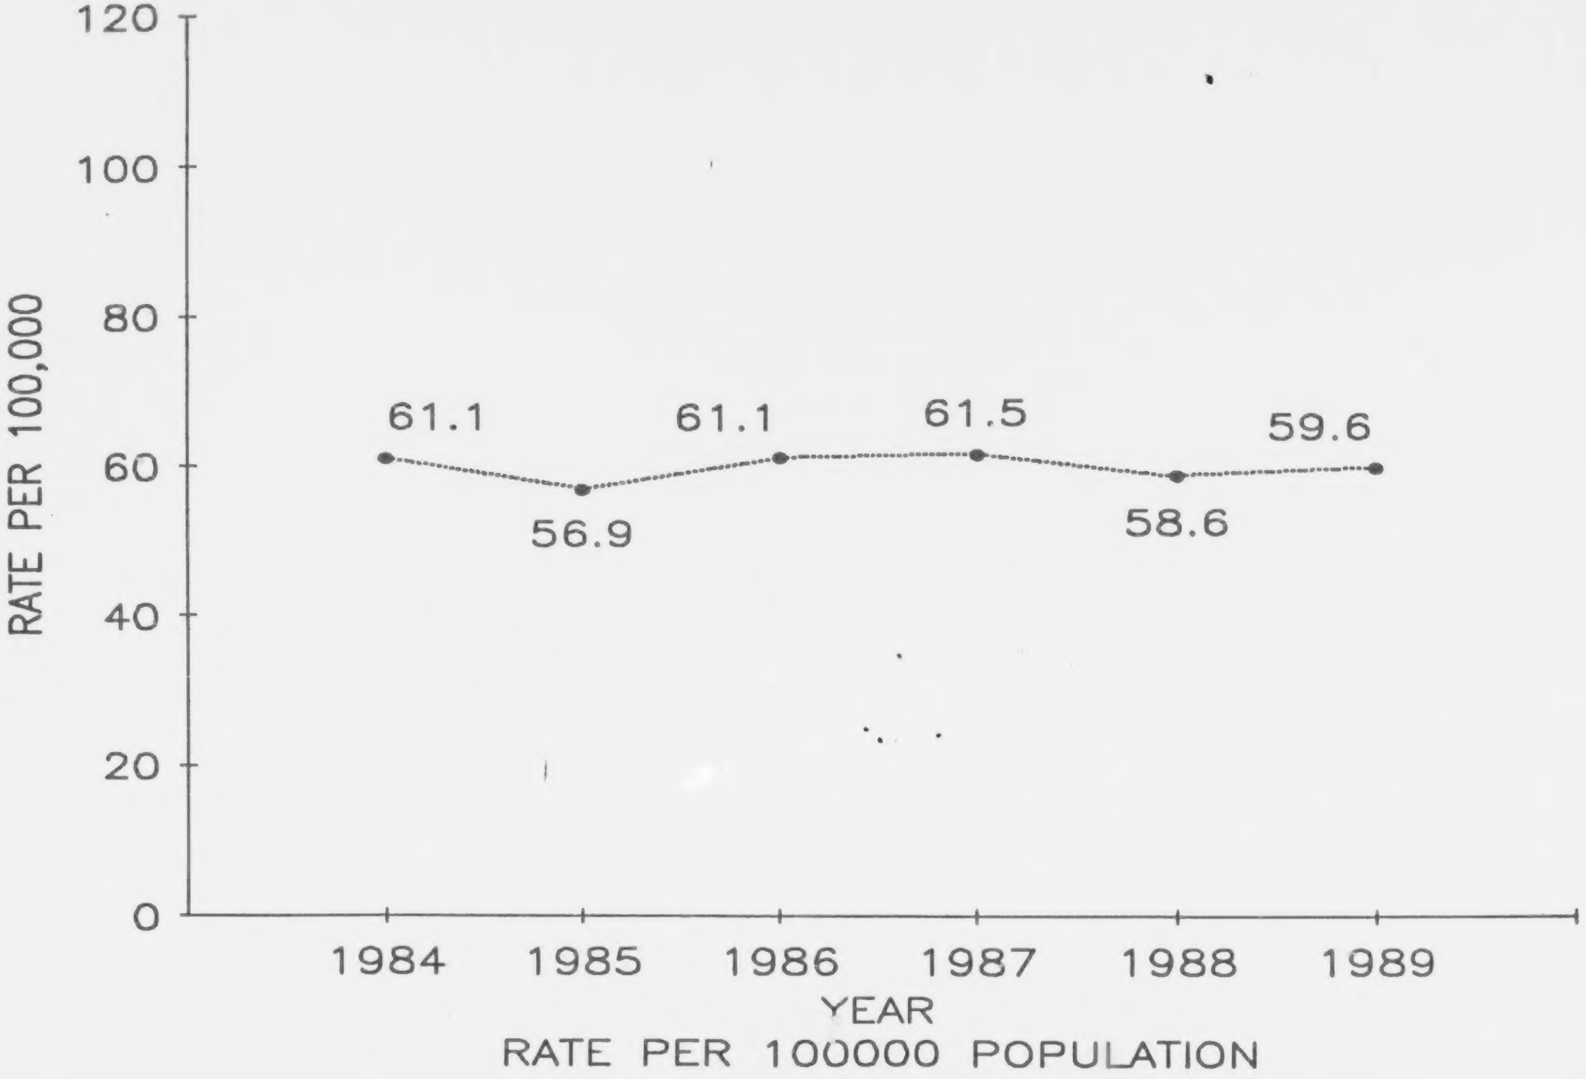
HOMICIDE
1984 - 1989, ICD (E960-E969)



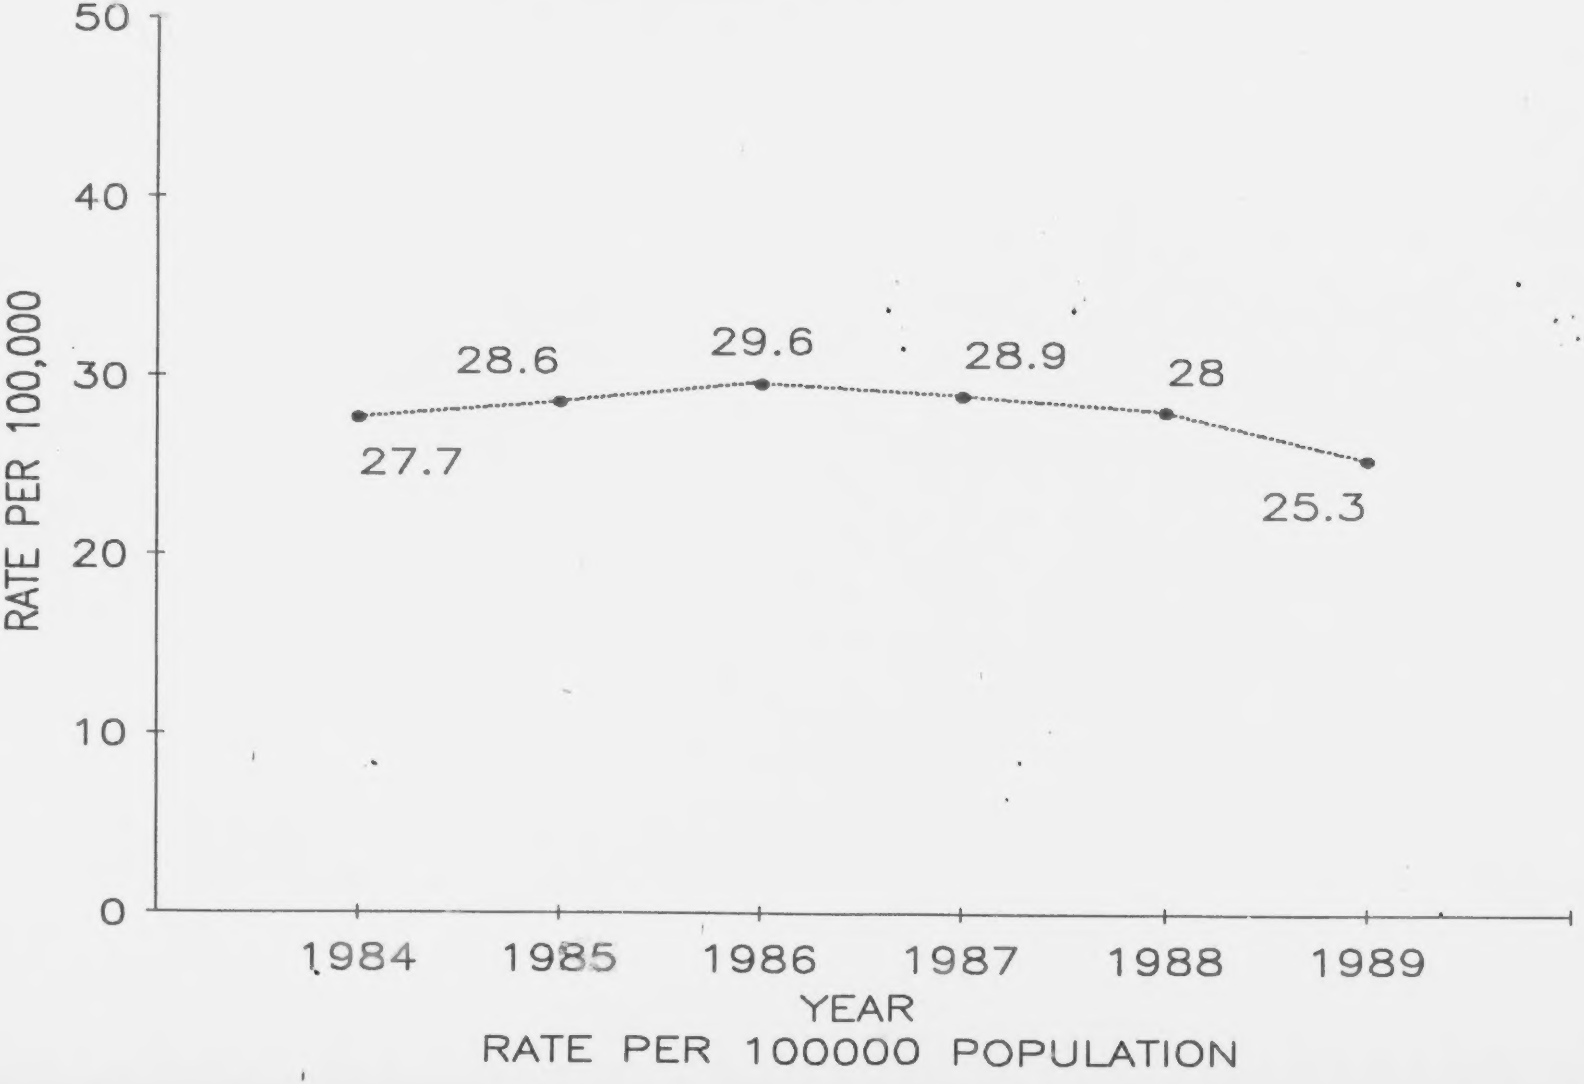
SUICIDE
1984 - 1989, ICD (E950-E959)



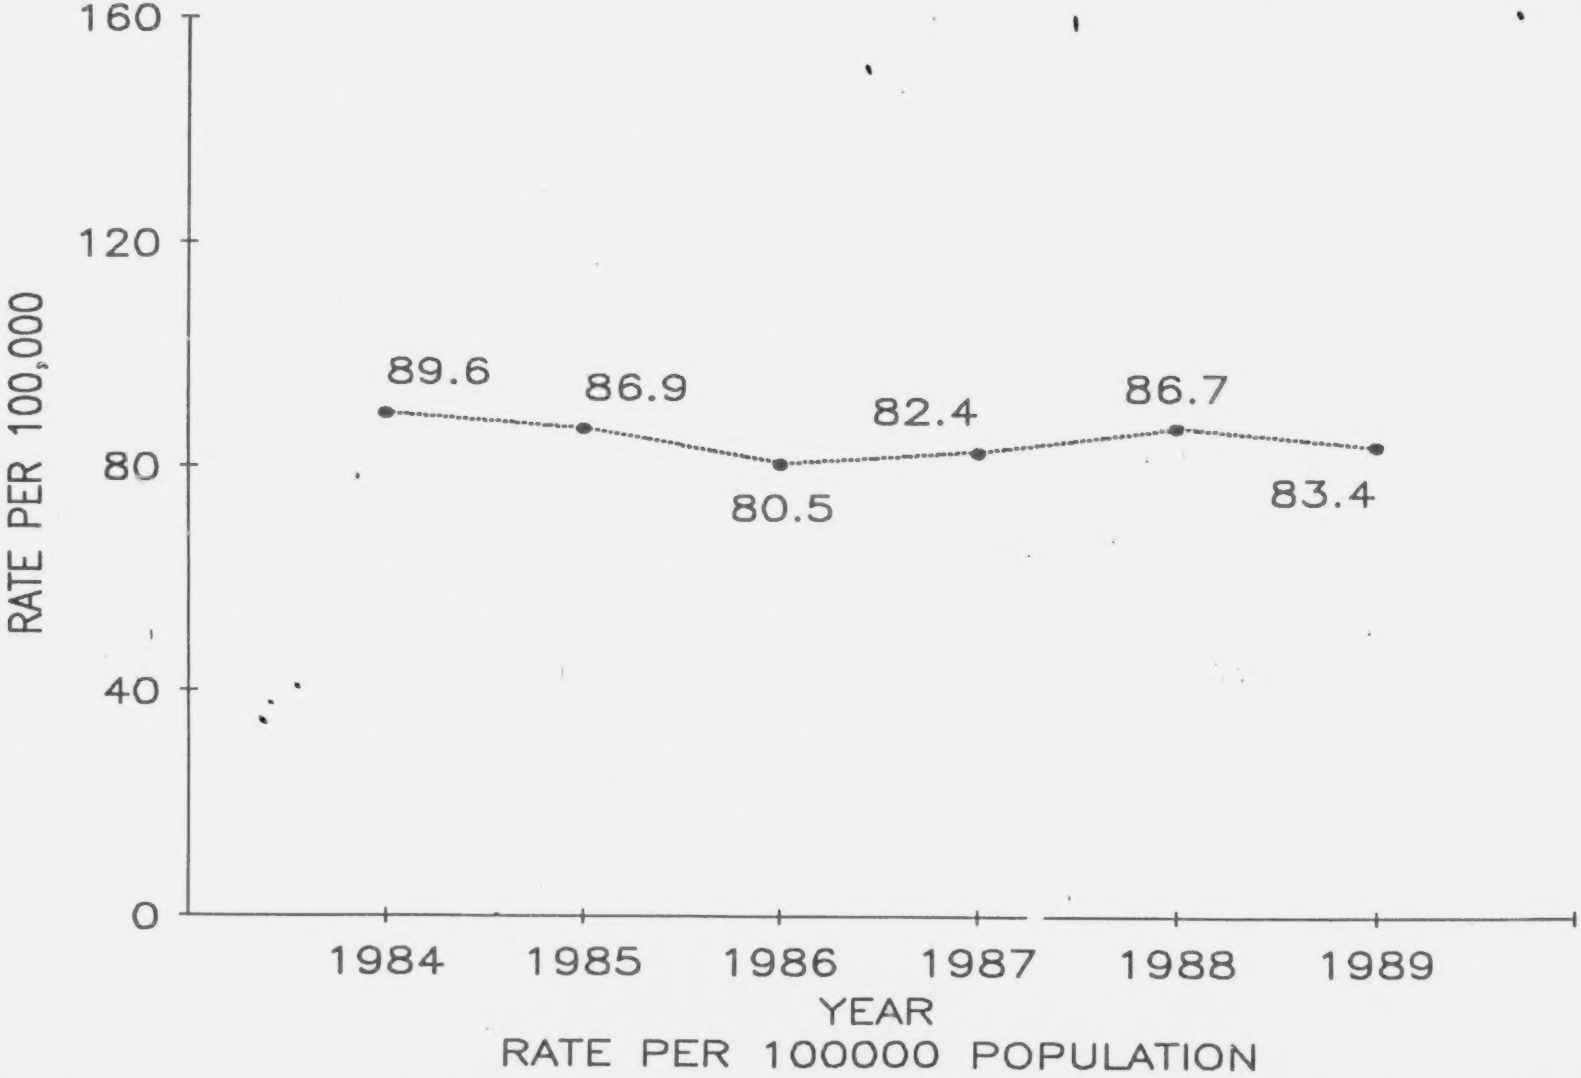
EARLY CHILDHOOD (1-4) DEATH RATES, 1984 - 1989



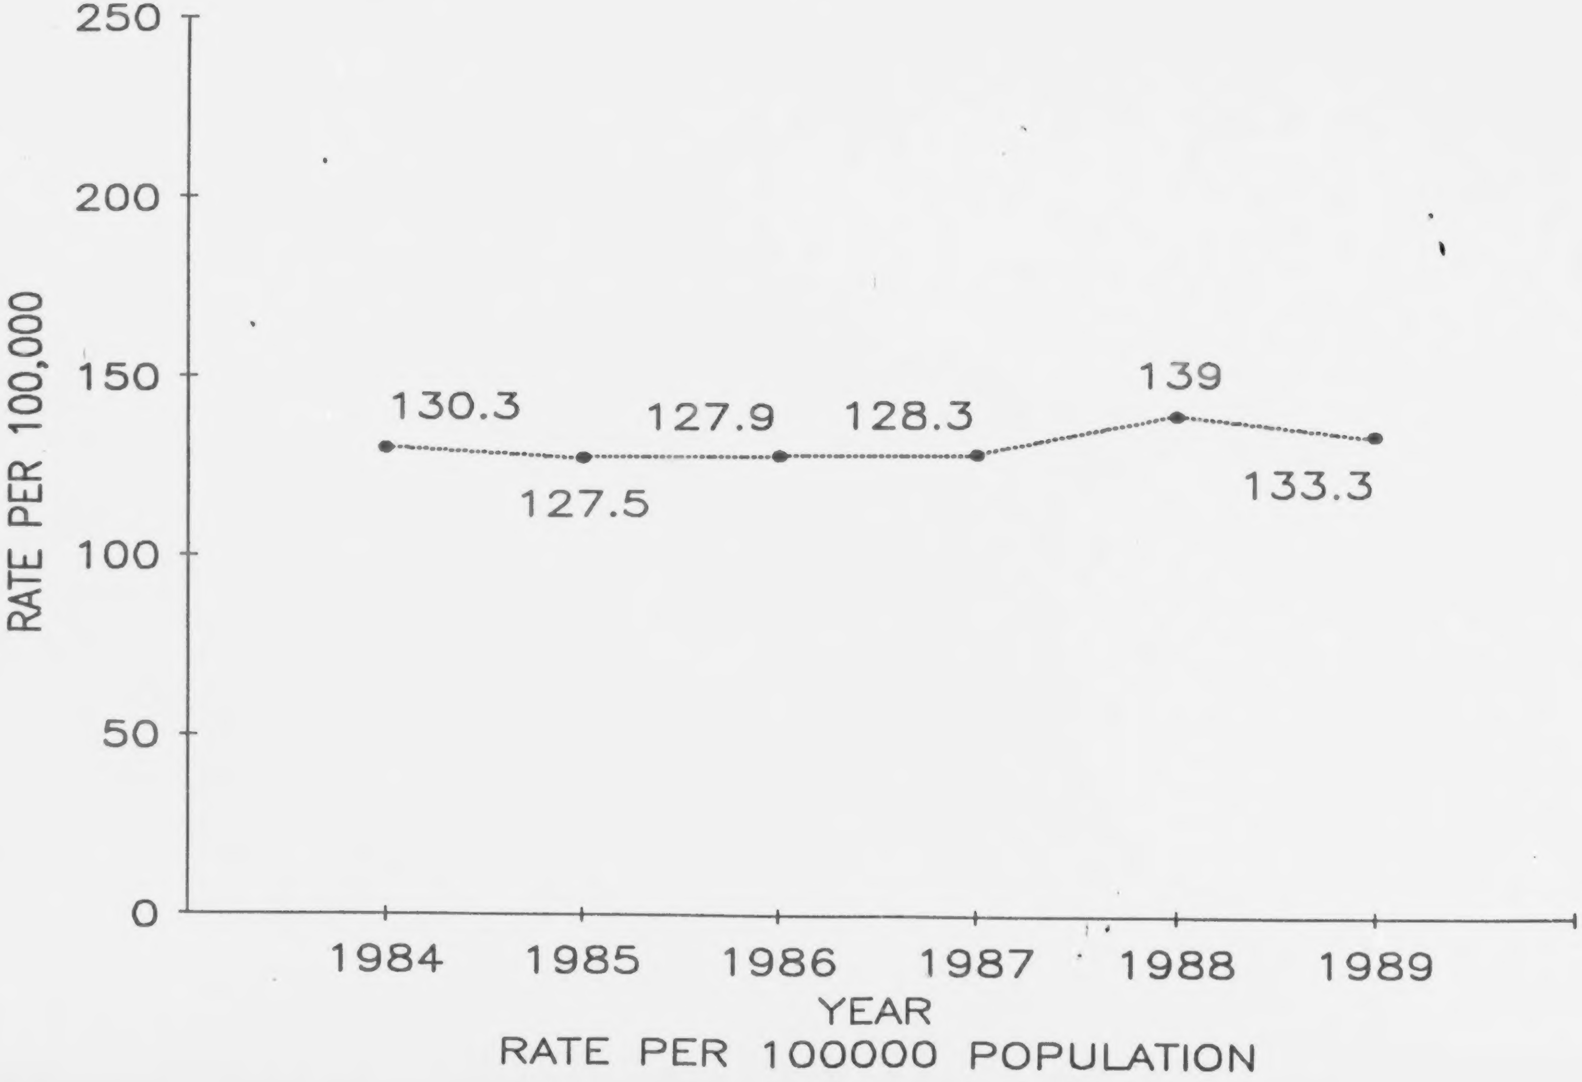
LATER CHILDHOOD (5-14)
DEATH RATES, 1984 - 1989



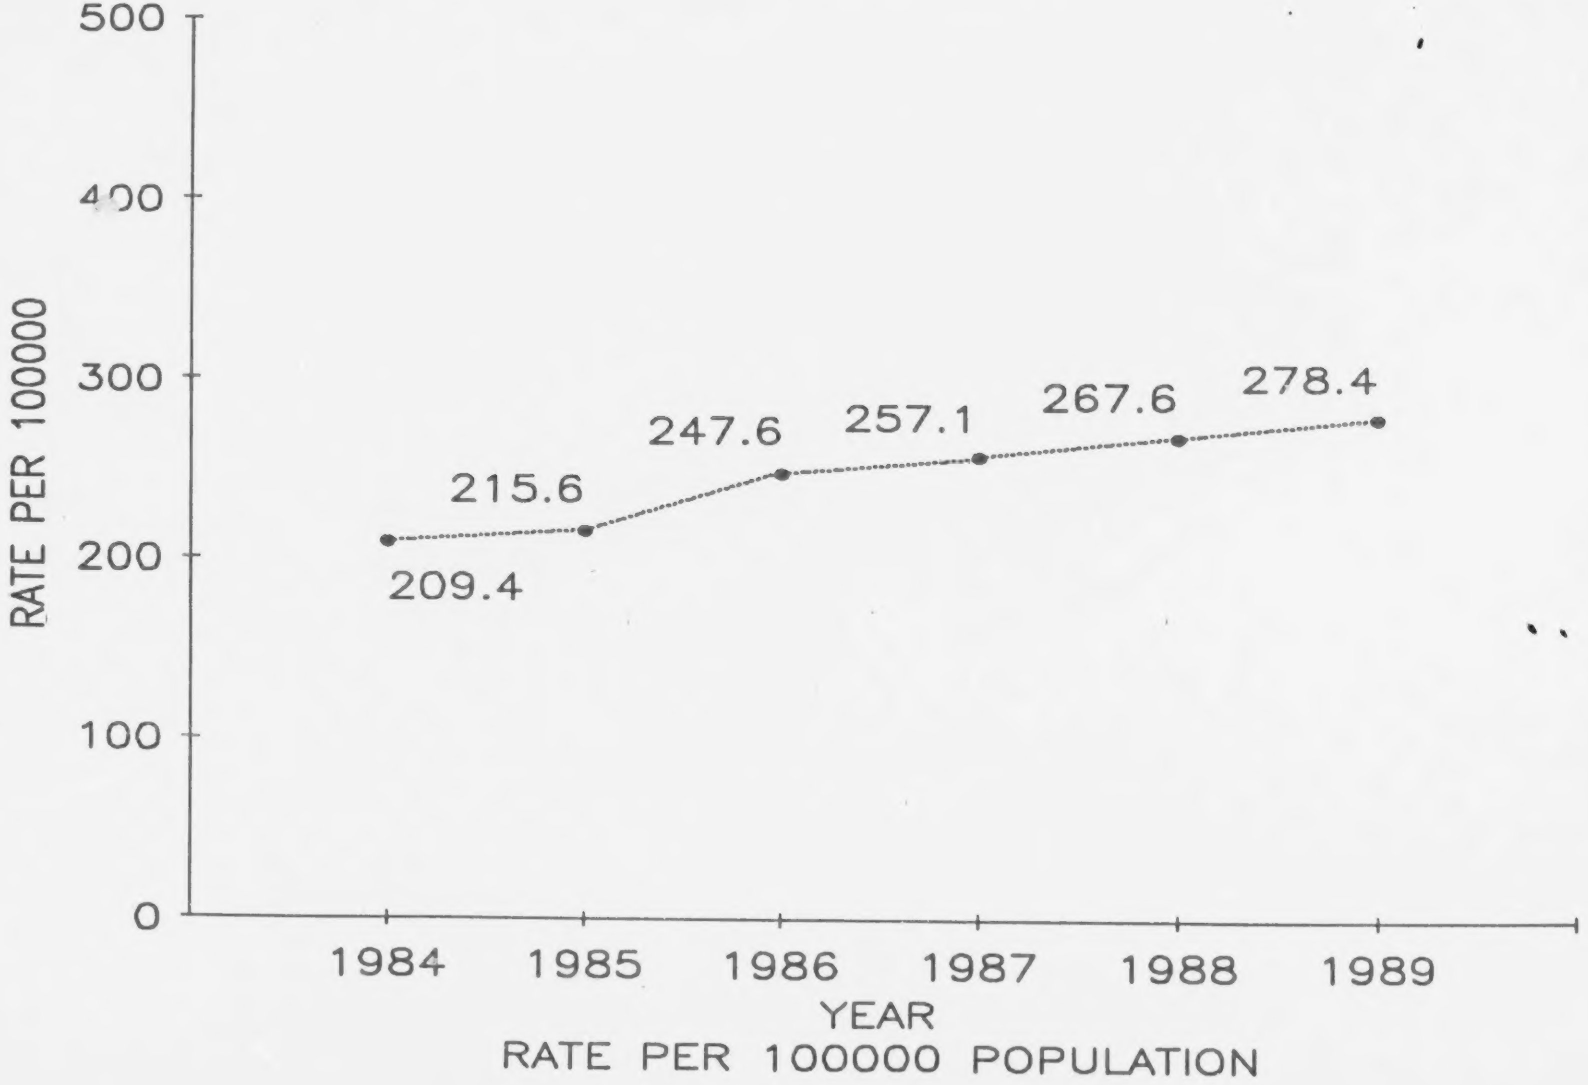
ADOLESCENCE (15-19)
DEATH RATES, 1984 - 1989



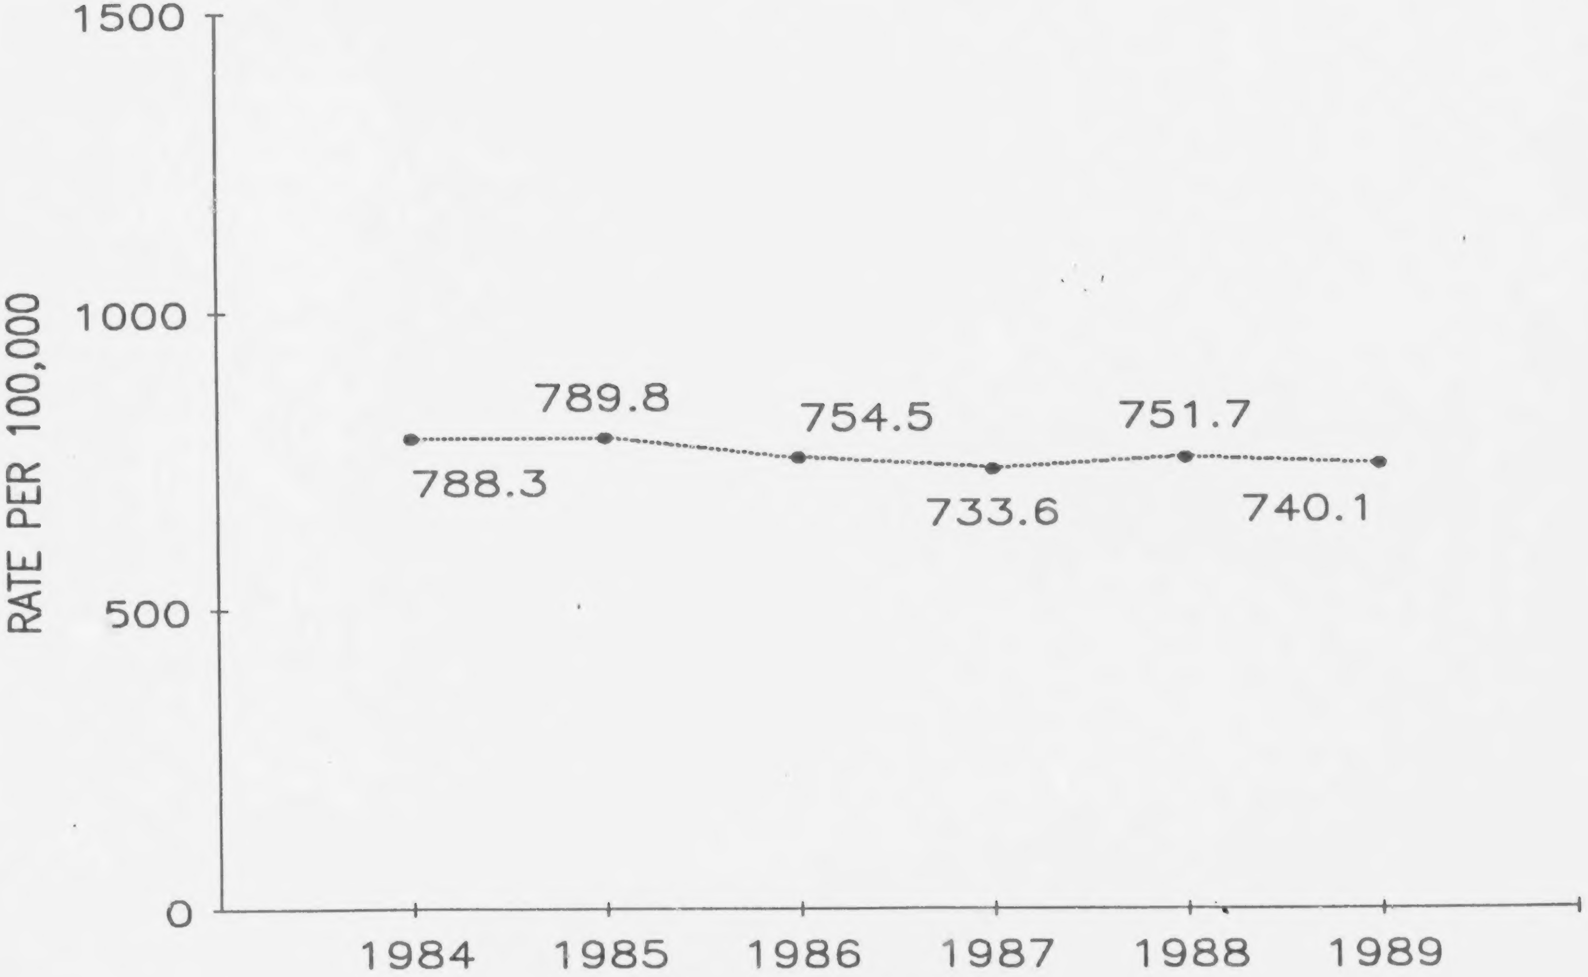
EARLY ADULTHOOD (20-29) DEATH RATES, 1984 - 1989



YOUNG ADULTHOOD (30-44) DEATH RATES, 1984 - 1989

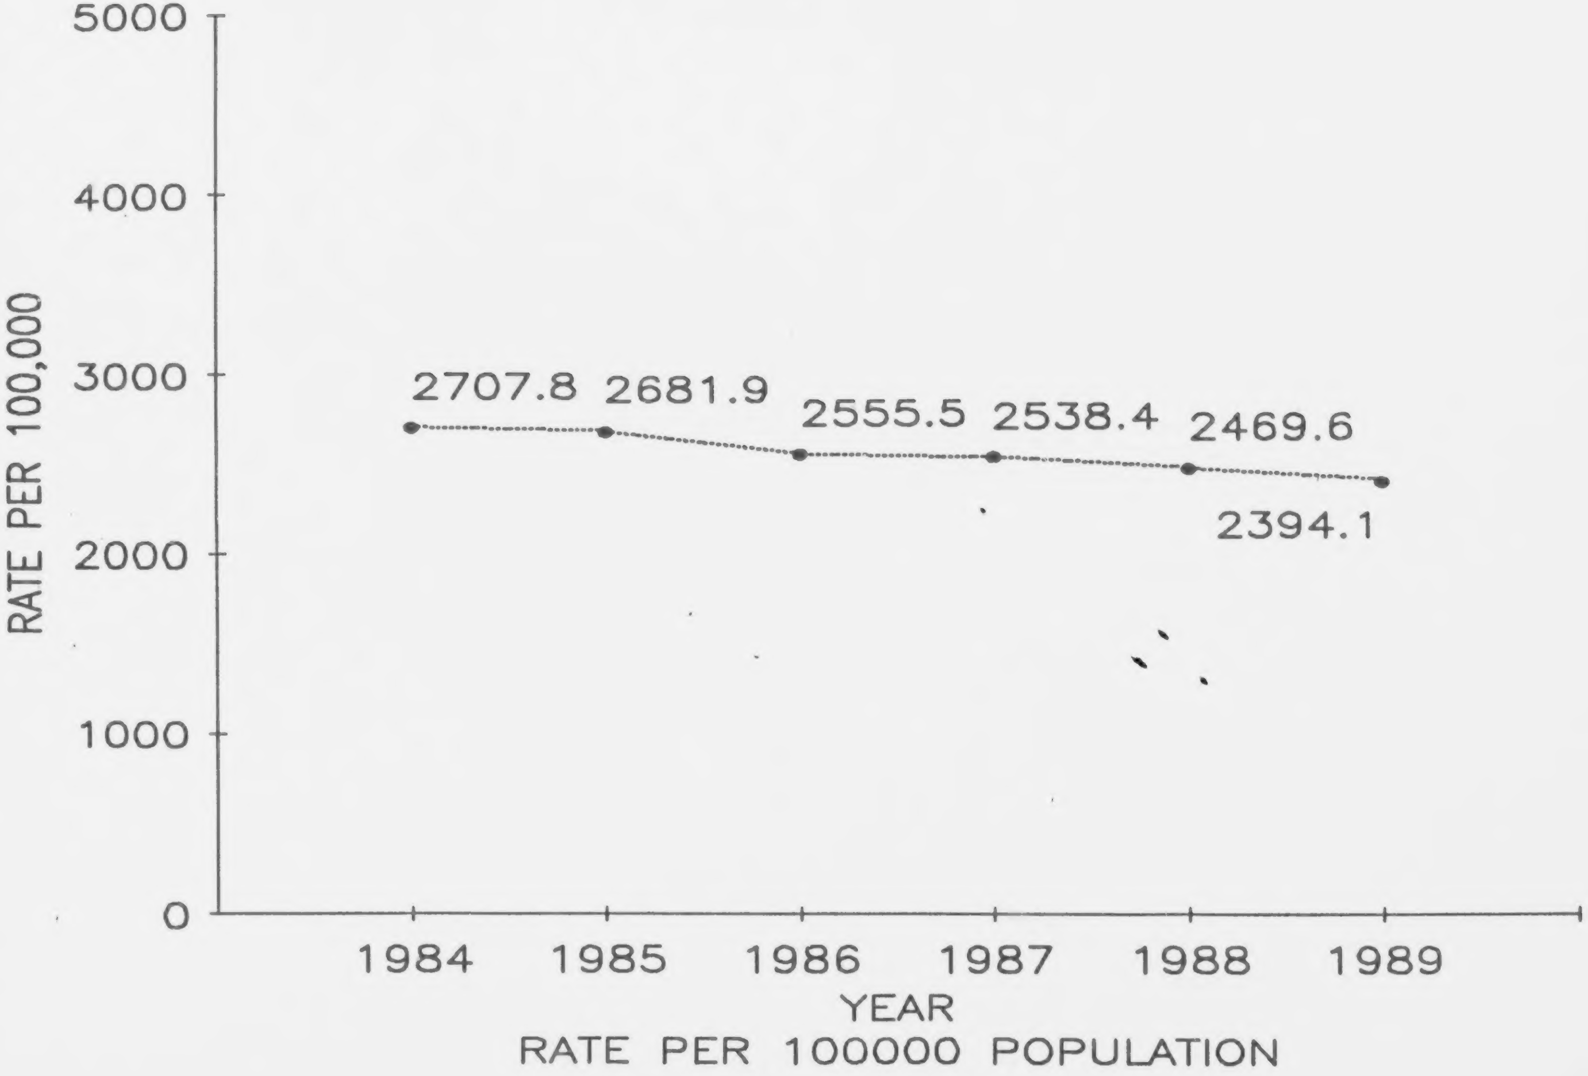


MIDDLE ADULTHOOD (45-59)
DEATH RATES, 1984 - 1989



RATE PER 100000 POPULATION

LATER ADULTHOOD (60-74)
DEATH RATES, 1984 - 1989



OLDER ADULTHOOD (>74) DEATH RATES, 1984 - 1989
